

# ECONOMIC DIGEST

19 NOVEMBER 2024

## 3Q 2024 GDP on track to achieve full year target

- Malaysia's economy grew by 5.3% YoY, **matched the advance estimate but slowed from the previous quarter** (2Q: 5.9%; 9M 2024: 5.2%; average 2017-2019: 5.0%). The continuous growth were sustained by 1) positive labour market, 2) supportive policies, 3) stronger investment activities, and 4) steady inbound tourism, among others. On a QoQ seasonally adjusted basis, the economy eased to 1.8% (2Q: 2.9%).
- In line with our expectation, **services** (5.2% YoY) **and agriculture** (3.9% YoY) **expanded at a slower pace** while **mining fell** (-3.9%) after three consecutive quarters of growth, **due to maintenance activities**. On the other hand, construction and manufacturing sector continued growing at a higher pace.
- On the expenditure side (refer Table 1), **the expansion were underpinned by investment**, which improved in both public and private sectors, reflecting improved investor confidence. To note, FDI inflow to Malaysia rebounded by 21.3% YoY in 1H 2024 (1H 2023: -25.6%). Besides that, public consumption grew at a faster pace of 4.9%. However, these were **insufficient to fully offset the moderation in private consumption** (4.8%) as it accounted for the largest share of GDP at 60.7%. Slower private spending came in despite one-time transfer of funds from Account 2 to Account 3 in the Employees Provident Fund (EPF), suggesting that members may have used it to settle their financial debts, set it aside for rainy days or invested it.
- Moreover, as the **gap between import** (3Q: 13.5% vs 2Q: 8.7%) **and export** (3Q: 11.8% vs 2Q: 8.4%) **became more pronounced** in 3Q, net exports declined -8.8% (2Q 3.4%). Nonetheless, **stronger import growth was driven by higher demand for capital** (3Q: 46.7% YoY; 2Q: 24.0%) and **intermediate goods** (3Q: 33.3%; 2Q: 28.7%).
- YTD, GDP grew by 5.2% YoY, **on track to land within our in-house GDP forecast range of 4.3% - 5.3%** (MOF: 4.8% - 5.3%) for 2024. For **2025**, we foresee **GDP to expand at a slightly higher range of 4.5% - 5.5%**, propelled by 1) continuous improvement in the labour market; 2) civil servants' salary revision; 3) expansionary Budget 2025, 4) acceleration of 12MP's projects in the final year; 5) relatively strong Ringgit; and 5) full recovery of tourism activities.
- Under **Budget 2025**, various cash aids (e.g. Rahmah cash & basic contribution, RM500 for civil servants & RM250 for pensioners) and higher minimum wage of RM1.7k (current: RM1.5k) are positive for consumer spending. However, other measures including the expansion of SST to non-essential goods, business-to-business commercial services and RON95 subsidy rationalisation weigh on consumption.
- We **remain cautious amid rising headwinds**, mainly stemming from the external side: 1) weaker-than-expected external demand; 2) potential escalation of US – China trade war following Trump's election win; 3) worsening geopolitical conflicts; and 4) lower-than-expected commodity production and prices.

Imports of goods & services	61.7	(6.7)	(8.8)	(11.3)	(2.6)	(7.4)	8.0	8.7	13.5
<b>Real GDP</b>	-	<b>5.5</b>	<b>2.8</b>	<b>3.1</b>	<b>2.9</b>	<b>3.6</b>	<b>4.2</b>	<b>5.9</b>	<b>5.3</b>

Economic Activity	Details
 <p><b>Services</b></p>	<ul style="list-style-type: none"> <li>Services sector growth <b>ticked slower</b> to 5.2% YoY in 3Q (2Q: 5.9%; 3Q avg 2017-19: 6.6%). <b>Growth decelerated for motor vehicles</b> (3Q: 3.5%; 2Q: 8.2%) and <b>retail trade</b> (3Q: 4.0%; 2Q: 5.6%). Moreover, <b>water, sewerage and waste management continued to decline</b> for second consecutive quarters albeit at a slightly slower pace (3Q: -3.9% YoY; 2Q: -4.0%).</li> <li>Meanwhile, <b>accommodation</b> posted the highest growth of 14.3% YoY, followed by <b>real estate</b> (14.2%), and <b>transportation and storage</b> (10.6%). In addition, <b>wholesale trade</b>, one of the largest contributor (12.4%) to services sector, accelerated to 4.4% YoY (2Q: 3.0%).</li> <li><b>Tourism recovery on track:</b> <ol style="list-style-type: none"> <li>For Jan-Sep 2024, <b>tourist arrivals</b> recorded 18.4 mil persons which stood at 91% of pre-pandemic's Jan-Sep 2019. <ol style="list-style-type: none"> <li>Among the top 3 countries, tourists from China (105%) has surpassed 2019 level, while Indonesia (96%) and Singapore (83%) continued to recover.</li> </ol> </li> </ol> </li> <li><b>Improving household disposable income</b> will support spending next year: <ul style="list-style-type: none"> <li>1) Improving labour market condition, 2) civil servant salary revision, 3) increased govt cash aids (e.g. STR, SARA, JKM, Budi Madani); and 4) higher minimum wage of RM1.7k (current: RM1.5k).</li> <li>Private sector (service &amp; manufacturing) wage growth improved to 2.9% YoY in 3Q (2Q: 2.6%). Additionally, household sector debt growth moderated marginally to 6.1% YoY (2Q: 6.2%).</li> </ul> </li> <li>Nevertheless, <b>purchasing power could be constrained by rising cost of living</b> (e.g. higher Diesel prices, upcoming RON95 subsidy rationalisation, subsidy removal for T15 household in public healthcare and education, progressive SST which will expand to non-essential goods (e.g. imported premium items) and fee-based financial services) <ul style="list-style-type: none"> <li>In 3Q, CPI inflation continued to lean towards services where it contributed 1.2ppt to overall 1.9% YoY inflation, unchanged from 2Q.</li> </ul> </li> </ul>

Economic Activity	Details
 <p data-bbox="201 582 365 613"><b>Manufacturing</b></p>	<ul style="list-style-type: none"> <li>• <b>Manufacturing sector increased by 5.6% YoY</b> in 3Q (2Q: 4.7%), the fastest pace since 3Q 2022 (13.1%). Highest growth was recorded by computers and peripheral equipment (16.1% YoY), tobacco products (15.7%), and vegetable and animal oils &amp; fats (15.5%).</li> <li>• <b>Electronic components &amp; boards</b> (semiconductor) – which makes up the largest share of manufacturing at 22.2% – <b>rose faster by 5.7% YoY</b> (2Q: 3.2%).</li> <li>• <b>Likewise, manufacturing indicators showed <u>positive</u> performance:</b> <ul style="list-style-type: none"> <li>• <b>Manufacturing IPI</b> +5.8% YoY in 3Q (2Q: 4.9%), the strongest in 2 years.</li> <li>• Manufacturing sales <b>expanded</b> +6.5% YoY (2Q: 5.7%), underpinned by <b>food, beverages &amp; tobacco</b> (12.3% YoY) and <b>electrical &amp; electronics products</b> (8.1%). Besides that, <b>exports sales</b> growth (3Q: 6.7% YoY; 2Q: 4.7%) has outpaced <b>domestic sales</b> (3Q: 6.2% YoY; 2Q: 8.3%) for the first time since 4Q 2022.</li> <li>• <b>Global uptrend in semiconductor sales</b> persisted for the 4<sup>th</sup> consecutive quarter with a robust double-digit growth of 23.2% YoY in 3Q (2Q: 18.3%).</li> </ul> </li> <li>• Even though manufacturing PMI remain contracted in Oct 2024 at 49.5, <b>new orders</b> had grown for the first time since Jun and <b>foreign sales</b> rose for the 7<sup>th</sup> month. Besides that, <b>import of capital goods</b> and <b>intermediate</b> goods expanded at a faster pace in 3Q, signaling a better outlook for the sector in the coming months.</li> </ul>
 <p data-bbox="219 1353 347 1384"><b>Agriculture</b></p>	<ul style="list-style-type: none"> <li>• Agriculture sector growth <b>moderated</b> to 3.9% YoY (2Q: 7.3%). While aquaculture subsector contracted (-2.2% YoY), all other subsectors grew. Palm oil growth softened (3Q: 7.3%; 2Q: 19.0%) while rubber subsector rebounded (3Q: 13.0% YoY; 2Q: -1.0%).</li> <li>• <b>All palm oil indicators showed <u>moderate</u> performance;</b> <ol style="list-style-type: none"> <li>1. Slower fresh fruit bunches received by mills, up 7.4% YoY to 28.6 mil tonne in 3Q (2Q: 19.6%).</li> <li>2. CPO production increased by 7.0% YoY to 5.6 mil ton in 3Q (2Q: 15.9%).</li> <li>3. CPO prices averaged slightly lower in 3Q at RM3,894 (2Q: RM3,982).</li> </ol> </li> <li>• European Commission has proposed to <b>delay the enforcement of the EU Deforestation Regulation</b> to 30 Dec 2025 (previous: Dec 2024) which may prompt <b>restocking activity</b>.</li> <li>• While palm oil demand is expected to <b>stay robust in the near term, production may face some challenges</b>. Local palm oil production for Oct 2024 dropped by 1.3% MoM and 7.2% YoY to 1.8 mil tonne, which is also <b>below historical average during the month of Oct</b> (2017-2019: 1.9 mil tonne).</li> </ul>

Economic Activity	Details
 <p data-bbox="221 555 349 621"><b>Mining and quarrying</b></p>	<ul style="list-style-type: none"> <li>• Mining &amp; quarrying sector <b>contracted</b> by 3.9% YoY (2Q: 2.7%), dragged down by negative growth of both oil and condensate (3Q: -7.3%, 2Q: 1.6%) and natural gas production (3Q: -2.8% YoY; 2Q: 2.9%), Conversely, other mining (3Q: 2.6% YoY; 2Q: 7.2%) increased but at a slower pace.</li> <li>• <b>Mining IPI contracted</b> by -4.6% YoY in 3Q (2Q: 2.4%), the weakest since 4Q 2020 (-10.0%). <b>Production plunged the most in Aug</b> (Sep: -2.2% YoY; Aug: -6.4%; Jul: -5.0%).</li> <li>• The mining sector's <b>lackluster performance is expected to continue next year</b> as the sector is projected to experience a <b>negative growth</b> of -1.0% YoY in 2025 (2024e: 2.2%) under Budget 2025.</li> <li>• IEA forecasts global oil to face <b>oversupply</b> condition by 1 mil barrels per day (bpd) or 1% of total global output in 2025. Growing <b>supply outside OPEC+</b> and sluggish demand (due to <b>transitioning to renewable energy &amp; electric vehicles</b> and <b>slower China growth</b> – the world's 2<sup>nd</sup> largest oil consumer after the US) are double whammy to global oil performance in 2025.</li> <li>• On the other hand, OPEC+ has delayed the phase out of supply cut to Dec (supposed to start in Oct) in order to support global oil prices.</li> <li>• OPEC+ still expects <b>global oil demand</b> to grow in 2025 but <b>at a slower pace</b> of 1.54 mil bpd (previous 2025f: 1.64 mil bpd; 2024e: 1.82 mil bpd). Some other upside potential include wider geopolitical conflicts &amp; US policy shifts (e.g. oil sanctions, delay climate policy).</li> </ul>
 <p data-bbox="211 1481 354 1508"><b>Construction</b></p>	<ul style="list-style-type: none"> <li>• Construction sector growth <b>augmented by 19.9% YoY in 3Q</b> (2Q: 17.3%), the strongest growth since 2Q 2021 (40.3%). This was <b>attributed to stellar growth in all subsectors</b>:             <ol style="list-style-type: none"> <li>1. Growth in <b>non-residential building</b> activities jumped to 28.1% YoY in 3Q (2Q: 2.8%).</li> <li>2. <b>Residential building</b> maintained double-digit growth of 22.7% YoY (2Q: 14.1%).</li> <li>3. <b>Specialized construction</b> continued double-digit growth for the 3<sup>rd</sup> consecutive quarter at 21.7% YoY (2Q: 27.0%).</li> <li>4. <b>Civil engineering</b> grew slower at 10.7% YoY (2Q: 23.6%).</li> </ol> </li> <li>• Likewise, construction <b>work done</b> surged by 22.9% YoY in 3Q (2Q: 20.2%), the highest since 3Q 2022 (23.2%). The robust performance was driven by all segment. Only <b>civil engineering</b> (3Q: 92.5%; 2Q: 92.4%) has yet to return to pre-pandemic's 2019 level.</li> <li>• Looking ahead, construction sector performance will continue to be supported by:             <ol style="list-style-type: none"> <li>1. <b>Continued progress of major infrastructure projects</b> (e.g. ECRL, RTS, Nenggiri Hydro, Pan Borneo Highway package 1a)</li> <li>2. <b>Major projects to begin construction</b> (i.e LRT Penang, Pan Borneo Highway package 1b)</li> <li>3. <b>Increase in private projects</b> (MIDA investment approval went up by 18% YoY in 1H 2024 to RM160 bil)</li> <li>4. The govt is expected to <b>accelerate the roll out of projects next year</b> (final year of 12<sup>th</sup> Malaysia Plan). As of Dec 2023, 2,433 projects (29% of total) are still needed to reach the 12<sup>th</sup> MP target.</li> </ol> </li> </ul>
